

AIRBRICKS

Product Dimensions

- STOCK CODE - ANC-AB
- PACK SIZE - 20
- COLOUR - NUMEROUS
- AIRFLOW - 6,500MM²

Our Airbrick has been designed to provide high levels of ventilation into cavity walls and under floor voids, when used in conjunction with our telescopic vent it will provide a free airflow of up to 6,500mm². The Air Brick incorporates a free draining front mounted grill which consists of evenly spaced openings specifically sized to prohibit vermin gaining access but wide enough to be maintenance free. The Air Brick is to be fitted to the external opening of the telescopic vent and built into the brick course as per normal practice, although care must be taken to keep the air flow passage clear from mortar drippings. As part of the design process, we calculate the air flow of each airbrick in the design, ensuring that building regulations are met. When purchased as part of a project we will supply the correct quantity relative to your build, a full design and guarantee on the product. Alternately, we can supply the units in packs with 20 pieces to a pack.
